## create the IBM Watson IoT platform and a device

The screenshot displays the IBM Watson IoT Platform interface. At the top, there's a navigation bar with 'Browse', 'Action', 'Device Types', and 'Interfaces'. The main heading is 'Browse Devices'. Below it, there are two buttons: 'All Devices' (selected) and 'Diagnose'. A descriptive text states: 'This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API.' Below this is a search bar labeled 'Search by Device ID' and a 'Device Simulator' link. The table below has columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. It contains one row for a device with ID 2401, status 'Disconnected', type 'Arduino', class ID 'Device', and date 'Nov 8, 2022 12:18 PM'. At the bottom, there's a pagination bar showing 'Items per page 50' and '1--1 of 1 Item'.

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
2401	Disconnected	Arduino	Device	Nov 8, 2022 12:18 PM
